

VBF Defense

VBF Defense is a unique formula designed to support your body's natural cleansing of **viral, bacterial, and fungal organisms**. The formula utilizes an exclusive 3-Pronged approach for maximum effectiveness. VBF Defense works with you, your genes and the microbes themselves.

There are numerous "one note" products lining the shelves of natural food stores that claim to stimulate the immune system. However, only VBF Defense plays the whole symphony. Utilizing an exclusive 3-Pronged approach it does not just stimulate the immune system, **VBF Defense** uses:

- Natural antimicrobials to neutralize virus, bacteria, and fungi;
- Micro-Immunotherapy to activate immune genes which strengthens the immune system;
- Pleomorphic somatoids to down regulate virulent pathogens to non-virulent microbes.

PRONG 1 - NATURAL ANTIMICROBIALS FOR IMMUNE SYSTEM SUPPORT

An antimicrobial is a substance that kills or inhibits the growth of microorganisms virus, bacteria, or fungi. The use of a natural antimicrobial during an acute infection supports your immune system by directly immobilizing the bad microbes. Decreasing the microbial load gives your immune system the winning edge, allowing it to recover and fight.

PRONG 2 - MICRO-IMMUNOTHERAPY

The **VBF Defense** formulation is developed along the same lines as Micro-Immunotherapy. This gene frequency targeting technology uses ULD - Ultra Low Doses of gene sequences to turn the immune system back on, restoring the defense system of the body to give back all its fighting potential.

PRONG 3 - PLEOMORPHIC THERAPY

Dr. Enderlein discovered that if a lower stage good form of the pathogen he calls Somatids were given in a micro dose remedy, it would degrade the bad pathogenic forms into the inactive primitive stages. These can then be eliminated through the urinary paths, intestine, skin, and bronchi.

Nanoceuticals

Cutting Edge Supplements for Super Health

Why Use Nanoceuticals?

The dual nature of our body can make health and wellness elusive. Two requirements must be met to be healthy. Both biochemical and biophoton support. (food & instructions)

Biochemically we require nano-sized physical nutrients. Our cells use these nutrients for all biochemical processes and as tiny building blocks. Every biochemical reaction is preceded by an electromagnetic signal, or biophoton. Cells communicate and deliver information between each other via biophotons. They orchestrate trillions of chemical reactions that take place every second. Without these biophotons the body would be an inanimate object.

Just as a contractor needs both building materials and a blue print to construct a house, your body needs nutrients and proper instructions to be healthy. BioLight Nanoceuticals contain both the needed nutrients in a special nano-sized cell ready form, and coherent information packed biophotons with instructions to help regulate proper cellular activities.

BioLight Nanoceuticals are used by those who want health and wellness. Anything else is less than half a solution. Support all of you, your whole self with the only biophoton infused nano-nutrients available.
